

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 95-08780

Priority: June 15, 1992

Minimum Instream Flow:

2495.00 CFS

This is to certify, that STATE OF IDAHO

IDAHO WATER RESOURCE BOARD

STATEHOUSE

BOISE ID 83720

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated June 15, 1992; and has submitted Proof of Beneficial Use on June 6, 1994. A minimum stream flow in

SPOKANE RIVER

tributary to COLUMBIA RIVER

has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE</u>
MINIMUM INSTREAM FLOW	11/01 to 06/30	2495.00 CFS
MINIMUM INSTREAM FLOW	07/01 to 10/31	951.00 CFS

LOCATION OF MINIMUM STREAM FLOW REACH:

Beginning of Stream Flow Reach

SWNE , Sec. 4, Township 50N, Range 05W

End of Stream Flow Reach

SWNW , Sec. 12, Township 50N, Range 06W
KOOTENAI County

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this right shall be non-consumptive.
2. This minimum streamflow shall be subject to future municipal and domestic development from the Spokane River and its tributaries for the use in the basin within and upstream of the minimum streamflow reach. The minimum streamflow will not be subject to water rights established in the future for irrigation uses or other large consumptive purposes even though covered under a municipal or domestic use definition.
3. Specifically because of the generalization of the Tennant method, the Director retains jurisdiction, as described below, to review and amend any and all parameters of this right. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the right. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the right should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the right would be in the public interest.

NOV 16 1995

State of Idaho
Department of Water Resources**WATER RIGHT LICENSE**

WATER RIGHT NO. 95-08780

CONDITIONS OF APPROVAL AND REMARKS

4. Use of water under this right shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the Director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than 06/15/1992.
5. Upon further finding and order of the Director that gauging stations are required to maintain the approved minimum flows on Spokane River, such measuring devices shall be permanently installed and maintained as specified by the Director.
6. Establishment of minimum flows on the Spokane River in the requested reach shall serve to protect water released from Post Falls Dam as it flows through the requested reach at rates up to the established minimum flow, but shall not directly or indirectly cause any change in operation of Post Falls Dam.
7. The reach of the Spokane River for which the requested minimum flows are established is as follows: Spokane River, commencing at a point downstream from the Post Falls Dam at which the overflow channels converge with the main channel below the dam in the SWNE, S4, T50N, R5W and extending downstream to the Idaho-Washington state line in the SWNW, S12, T50N, R6W, Kootenai County, a reach of approximately five miles.
8. This minimum stream flow is for the protection of fish and wildlife habitat, aquatic life and recreational values.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this 24TH
day of OCTOBER, 1995

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources will consider this form as a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee or a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 95-08780 Telephone No. (208) 327-7910

2. Name(s) of Permit Holder(s): IDAHO WATER RESOURCE BOARD

3. Post Office Address: 1301 N Orchard, PO Box 83720, Boise, Idaho 83720-0098

4. Source of Water: Spokane River

a. If ground water, well driller's name: _____ Date drilled: _____

b. Pump horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft.): _____

5. Extent of Use:

Domestic _____ (No. of households) Irrigation _____ (No. of acres)

Stockwater _____ (No. and type of stock) Other Minimum Stream Flow

6. Total rate and/or volume for which proof is submitted 2495 cfs _____ acre/feet

7. Refer to the approval conditions on your permit and respond accordingly:

Measuring device: Required? Yes XNo Installed? Yes XNo

OR

Flow Measurement Port: Required? Yes XNo Installed? Yes XNo

8. Fee Enclosed: \$ NA (See License Examination Fee Schedule)

9. Person to contact to accompany the Department representative during the field examination:

RIVER) TO ESTABLISH A MINIMUM)
STREAM FLOW IN THE NAME OF THE)
IDAHO WATER RESOURCE BOARD)**

**RECOMMENDED
ORDER**

On October 27, 1993, the Idaho Department of Water Resources (department) conducted a hearing to determine whether an application for permit to appropriate water, numbered in the Department records as 95-08780, should be approved or rejected. The application seeks to establish a minimum stream flow in the Spokane River, located in Kootenai County.

Notice of the hearing was published in the Coeur d'Alene Press in Kootenai County and statewide in the newspapers in Lewiston, Boise, Twin Falls and Idaho Falls. The Idaho Water Resource Board (Board) appeared as a formal party, and full party status was granted to intervenor Spokane River Association represented by Mr. Robert Nonini. Other individuals and representatives of organizations also appeared and presented their views and comments as public witnesses.

The hearing officer left the hearing record open until November 8, 1993 for submission of written public interest comments. Two comment letters were received after the hearing and six before the hearing. The evidence having been taken, and the record having closed, the hearing officer, as a representative of the Director of the Department of Water Resources, proposes the following Findings of Fact, Conclusions of Law, and Order:

RECOMMENDED ORDER - Page 1

AUG 11 1994

FINDINGS OF FACT

1. Application for minimum stream flow No. 95-08780 proposes the following:

Rate of Flow: 2495 cfs from November 1 through June 30;
951 cfs from July 1 through October 31.

Location: Spokane River, commencing at Post Falls Dam, located in both the SW 1/4 NW 1/4 and the SE 1/4 SW 1/4, Section 3, T50N, R5W and extending downstream to the Idaho-Washington state line in the SW 1/4 NW 1/4, Section 12, T50N, R6W, B.M., Kootenai County.

Purpose: In stream flow use for the protection of fish and wildlife habitat, aquatic life and recreational values.

Priority Date: June 15, 1992.

2. At the hearing, the applicant requested that the location of the place of use be changed to read as follows:

Spokane River, commencing at a point downstream from Post Falls Dam at which the overflow channels converge with the main channel below the dam in the SW 1/4 NE 1/4, Section 4, T50N, R5W and extending downstream to the Idaho-Washington state line in the SW 1/4 NW 1/4, Section 12, T50N, R6W B.M., Kootenai County, a reach of approximately five miles.

3. The Idaho Water Resource Board asked Fish & Game about specific data regarding Spokane River which could be used to establish a minimum stream flow.

4. While Fish & Game has not specifically studied the Spokane River to determine the minimum stream flow, a study conducted by Donald L. Tennant, a fisheries biologist for the U.S. Fish & Wildlife Service, concluded, after analyzing several western streams, that the percentage of the mean flow in the stream is related to the quality of the fish and aquatic habitat and the riparian health of the stream. Tennant's study was submitted as an exhibit, and marked IWRB 5. The study contains a table which lists the quality of various

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

RECORDED

AUG 11 1994

ATTACHMENT TO APPLICATION FOR PERMIT
TO APPROPRIATE A MINIMUM STREAM FLOW

14. Provide evidence that the appropriation will not interfere with any vested water right, permit, or water right application of earlier date of priority.

The appropriation is junior to rights, permits, or applications with earlier dates of priority.

15. Provide evidence to show that the appropriation would be in the public interest as opposed to private interest.

The appropriation will be held by the Water Resource Board rather than a private entity.

The appropriated water will preserve river values for the benefit and enjoyment of all citizens of the state.

16. Provide evidence or justification that the appropriation is necessary for the purposes shown in Item 4.

The appropriation is for 40% of the mean annual flow for the period of November through June.

The request for the rest of the year is for the average monthly flow for August, the lowest month for the period of record. This flow is close to 15% of the mean annual flow. These flows will provide a "good" or better minimum flow for fish and wildlife habitat, aquatic life, and recreational values except for July to October.

17. Provide evidence that the minimum flow or lake level is minimum and not the ideal or most desirable flow or lake level.

The requested flows are based on the Montana Method which utilized field studies to identify riverine conditions at varying flow rates. The optimum flow for fish, wildlife, recreation and related environmental resources ranges from 60% to 100% of the mean flow value.

18. Provide evidence that the flow or lake level requested is capable of being maintained as evidenced by records of stream flows and water levels.

A flow of 2495 cfs is less than the average monthly flow for the requested period of use. The flow of 951 cfs is the lowest average monthly flow of the year for the period of record.

19. Describe the location of existing gaging stations that can be used in the administration of this appropriation.

The Post Falls gage which is one mile downstream from the Post Falls powerplant.

20. Do you intend to install additional gaging stations? Describe the location.

No

21. List any additional remarks related to this minimum stream flow application.

The flow request for July, August, and September provides only a "fair to poor" minimum flow for those months. Following consultation with the Division of Environmental Quality and the Departments of Fish & Game and Parks & Recreation, the Water Resource Board may amend this application to more accurately reflect the necessary minimum flow based on new data provided by the above or other agencies.

Stage: PERMIT

Point(s) of Beginning Stream Reach: T50N R05W S04 SW NE
Point(s) of Ending Stream Reach: T50N R06W S12 SW NW

Pou County:

Remarks: This minimum streamflow shall be subject to future municipal and domestic development from the Spokane River and its tributaries for the use in the basin within and upstream of the minimum streamflow reach. The minimum streamflow will not be subject to water rights established in the future for irrigation uses or other large consumptive purposes even though covered under a municipal or domestic use definition.

Specifically because of the generalization of the Tennant method, the Director retains jurisdiction, as described below, to review and amend any and all parameters of this permit and subsequent license. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the permit or license. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the permit or subsequent license should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the permit or license would be in the public interest.

Use of water under this permit shall recognize and allow the continued beneficial diversion of water under any prior existing water right established by diversion and application to beneficial use or by an application, permit, or license on file or issued by the Director under the provisions of Chapter 2, Title 42, Idaho Code, with a priority of water right date earlier than June 15, 1992, for application No. 95-08780.

Use of water under this water right shall be nonconsumptive. Upon further finding and order of the Director that gauging stations are required to maintain the approved minimum flows on Spokane River, such measuring devices shall be permanently installed and maintained as specified by the Director.

Proof of instream beneficial use of the minimum streamflow may be submitted immediately upon legislative approval of the permit, but shall be submitted no later than March 1, 1999.
