RE: Correction to License

The Eastern Regional Office identified a discrepancy in the conditions for this license. It had a combined use limit of 6.14 cfs when all associated rights have a combined use of 8 cfs. They are getting ready to file a transfer on this and on related rights and are requesting that this issue be addressed.

per SRBA decrees

The correction to the license will be made from 6.14 cfs to 8 cfs. The additional rate is a result of claim 33-11002. The extra amount is based on the field exam for 33-2106 which justified extra amount due to losses. *under 33-11002 measurement*

Further Information:

33-7179 is combined with 33-2034 to make 0.02 cfs/acre from Black Creek, which is applied to land under rights 33-87, 33-2034 and 33-7179.

33-87 is from Deep Creek only

33-2034 is from Black Creek and Deep Creek

33-7179 is from Black Creek only

RE: Application for

Dear Mr. Jones:

This letter is written to contemplate transferring approximately 400 inches the acre. However, as shown in the Valley with discharge to the Area to the discharge to the attached tables from Therefore, we believe the as follows:

Total Transfer
Average Loss
Net to irrigated

Acres irrigated
Net Applied in

Therefore, we believe the upper Birch Creek

INTER-DEPARTMENT MEMO

SUBJECT: excess cfs
DATE: 1-22-01

The original right had late claim 33-11002 filed as companion because of a need for additional cfs on said place of use. (See SCG memo) with this transfer to Basin 32, the well pumps into Birch Creek some miles above the place of use. The applicant feels the had lost justify the additional cfs claim 33-11002, following rights 33-02106 & 33-02107.

Please note Gross E-mail of Oct 25, 2000 that this applic. go thru hydrologic review at the State Office. (X) For your information (Doug)
