Mr. Westra:

We are writing this letter to express our concern regarding the misuse of domestic ground water for larger usage than the ½ acre allocation

Water levels in the last few years have dropped causing low pressure and lower water levels. There has been an extremely bad iron/sulfur smell in the water, which has caused some residents to have to install expensive water treatment systems to remove the odor from the water.

There needs to be an immediate stop put to this type of usage before there is no water. These people need to utilize the irrigation surface water for their pastures, crops and oversized yards. Below is a list of the obvious properties in the area that are using the domestic ground water to irrigate more than their ½ acre allocation. A closer look on your part of the surrounding area for other violators would be necessary.

RE: Background for Applications

The filing of the two individual applications are the result of a complaint filed by area neighbors, see files. Both applicants were beneficially using groundwater for irrigation beyond their domestic water rights. (Hansen 63-22790 & Vance 63-19136). Applicants have filed for water bank rental in the interim for this season.
