COMMENTS: Water levels have shown steady decline in past four years, averaging about 1.3 feet per year (W.I.B.'s 5, 11, & 18). Static water level about 260 feet below L.S.D. Primary aquifer is sand and gravel beginning about 228 feet below L.S.D. Specific capacities of nearby wells in same aquifer range from 128 to 256. Economic pumping lift is probably only factor limiting development.
