10. Remarks There is a great demand for lots to park trailers on in this area and the demand seems to be increasing. The water to be used will come from the underground water shelf extending from Lake Pend Orielle to, and, through Eastern Washington. Lake Pend Orielle is over 2000 feet (1/2 mi.) deep and is a natural reservoir. The water is pure and very cool year around. There is an ever abundance of water in this area even in a dry year. This part of Idaho is truly the land of the lakes. The pump house will be constructed of 6" masonry blocks, above ground, with a steel entrance door and a scuttle hole above the well casing. The floor will be a concrete slab 6 inches to 8 inches thick and the cieling will be insulated with rolls of fiberglass. We will also have a well heater (elec.) installed near ~~pump~~ storage tank and well casing. The casing to be sunk by registered and bonded well driller and the pump is to be installed by a licensed and bonded pump company also. Wiring will be done by a local electrician probably Tom Electric from Coeur D' alene. All sewage will be kept the required distance from proposed new well. The land all lies level in this 1/4 section of land so there will be no problem of drainage towards the pump house.

Hellman Drilling Co. will sink the well and Art Franke Pump Co. will install the pump. They both reside in Spokane County, Washington.
