

## MEMORANDUM

**Date:** June 18, 2008  
**To:** Water Right File 2-10343  
**From:** medl  
**Re:** permit review

---

I copied the POD and POU shapes from the Application layer to the Permit layer.

I checked Water Bank records and found that the Water Bank had processed a three-year rental (WR 2-2240 and WR 2-2431) in the name of TRF c/o R Caldwell. This permit is in the name of TFR c/o Richard Caldwell. Note that the partnership abbreviation has not been consistent on various department forms. TRF may be a typo of TFR.

As of this review, there is no requirement for a measurement device in this basin. But quantifying the annual volume is an important objective for this right. I added a special condition which limits the annual diversion volume, including refilling due to seepage and evaporation, to 50 AF.
