Subject: RE: Spring Canyon Ranch water right 37-8659

Hi Michele,

I just spoke with David Knolton, the Ranch Manager for Spring Canyon Ranch. I asked him if those wells were ever connected physically in the same system. He said that was his intent, but no they have never been connected.

Hope that helps.
Erick

Erick
Thanks for being willing to help me with this one.
Michele

Mr. Charles E. Brockway,
It was a pleasure to meet you while you were here in Boise this week.

Your letter clarifying the source for the Spring Canyon Ranch geothermal license was very helpful. They should have received the license amendment we will need signed in order to finish that right.

While that area is still fresh in my mind, I would like to finish the work for their other water right permits. Spring Canyon Ranch also has an irrigation permit **37-8659**. Your firm conducted the beneficial use field exam in August 2006. I have received the shape files that I requested from Amy Runser and I have reviewed the file. **It's not** apparent to me that the two pumps are interconnected. If they are separate systems, it means that we may have to split this water right and Shelley Keen said he would help me do that.

I am hoping you can confirm for me whether or not the two pumps are one single system.

Thanks again,

Michele Edl
