Idaho Falls, Idaho 83402-1718

Dear Mr. Carlson

Per your letter dated June 20, 2007 we are returning the signed application on the computer generated form.

The following is an answer to the request for additional information:

The potential to reduce the quantity of water under existing water rights

The point of diversion requested is very close to the mouth of Lake Creek. There are no diversions between our point and the Salmon River

The sufficiency of the water supply for the proposed appropriation.

I measured the flow today and have attached a sketch showing my flow calculations.

Depth of water was measured on the lee side of the measuring stick (lower than front side of stick). It appears we are requesting 1.5% of available water.

The good faith nature of the application

We are just finishing our home and are desiring to irrigate only the flat land for garden, orchard, pasture and general appearance. It would also provide some fire protection for out buildings and fences.

The adequacy of the applicant's financial resources

We have sufficient funds to install the pump, water lines, sprinkler heads and controls.

The local public interest in the public water resource

We have been building our house for over a year now and to the best of our knowledge we have not observed any public use of the creek, ie: fishing , picnicking or other use. A few stray range cows drink water out of the creek which would not be affected by our use.

The conservation of water resources in Idaho

We are requesting a very small amount of water for beneficial use. We understand the need to use the water we have in the best way possible. The system we plan to use should be able to control and direct the water only where needed and in the amount needed.

Impacts to the economy of the local area or watershed

We cannot envision any negative impacts to the local area or watershed.

Please call if you have any questions.

Our phone number is 208-756-1040.

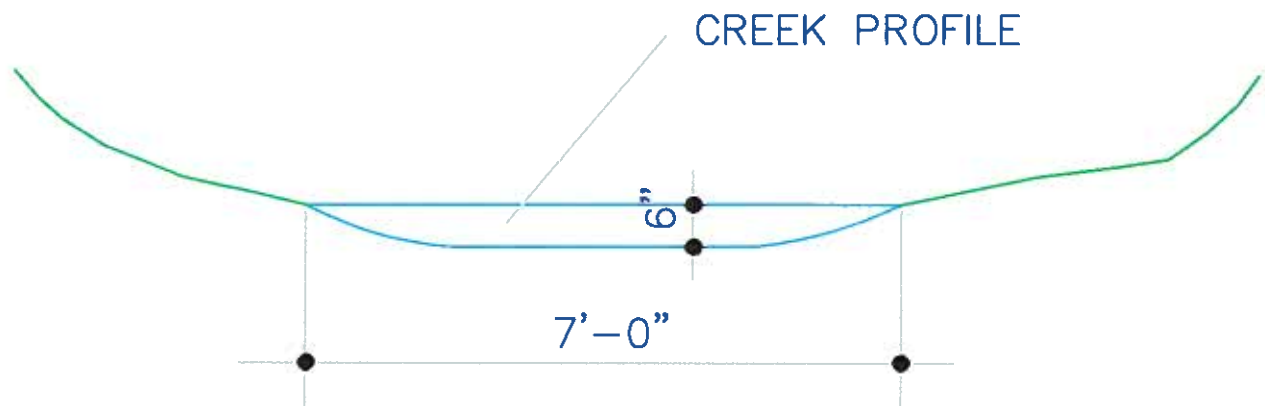

We have also discussed our proposed use with Bob Foster, Sr. Water Resource Agent, in the Salmon Regional Office. He can give you his insight and opinions of our request

Sincerely,

A handwritten signature in dark ink, consisting of several overlapping, sweeping strokes that form a stylized, cursive representation of the name Kerry F. Beyeler.

FLOW MEASURED ON JULY 17, 2007

AREA = 2.8 SF

FLOW RATE = 1 FT IN 1.5 SECONDS

CFS = $2.8 \times .67 = 1.876$ CFS

WATER USE REQUESTED = .03 CFS WHICH IS
APPROXIMATELY 1.5% OF WATER AVAILABLE

KERRY F. BEYELER
