Re: permit review

I copied the Application layer POU and PODs shapes into the Permit layer. I found that the amended application has PODs located in lot 4 of SE1/4SW1/4. The quarter-quarter address is correct but the SESW is not in lot 4. Only the SWSW is in lot 4.

The advertisement also had lot 4 listed with both the SESW and the SWSW. Although confusing, the advertised listings were correct in part so I deleted lot 4 from the data entry for each POD. The processes of copying the POU shape and updating its PLS/acreage, overwrote the incorrect lot 4 listings for the POUs.
