Subject: Transfer application correction letter

To IDWR, Just recently I signed a transfer application (74814) which placed a proposed new point of diversion in the SWNW quarter of 6S 30E 02 (6S 30E 02 SWNW). The Department of Water Resources further reviewed the transfer application (74814) and found that the legal description of the proposed new point of diversion is incorrect. The new point of diversion should be placed in the NWSW quarter of 6S 30E 02 (6S 30E 02 NWSW). Changes to the transfer application (74814) are being made by the Department of Water Resources (Eastern Region) which would place the proposed new point of diversion in the NWSW quarter of 6S 30E 02 (6S 30E 02 NWSW). I agree to the changes made in the transfer application which places the proposed new point of diversion in its correct location (6S 30E 02 NWSW). Thank you, Michael Schritter for Schritter Farms
