Subject: RE: Hansen Amendment

Hi Lori:

Thank you for clearing that up. Must have been a mix-up somewhere at IDWR. I will forward the amendment application to SO for follow up with that field exam.

Steve

Subject: Hansen Amendment

Steve,

Attached is the cover letter I sent to Shelley that references Dan Hansen's amendment for permit 63-31261. The amendment was submitted with a field exam package that included proof of beneficial use and beneficial use field report for permit 63-31261. Because dust control use was established during the permit development period and did not result in an expansion of the original permit parameters, the amendment could possibly be treated as a licensing amendment which is why it was included in the field exam package. Please let me know if you have any questions. Thanks Steve.
