Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Gentlemen:

The Idaho Department of Water Resources (IDWR) is returning your recently submitted application for the following additions and corrections:

Item #3 Point of Diversion

The point of diversion must include the 40-acre quarter quarter where it's located. Please indicate the quarter quarter in the spaces provided in this section.

Item #9 Place of Use

This portion of the application was left blank. Please complete this section by placing an "M" in appropriate section quarter quarter for where the water will be used. This will be the quarter sections within the City's service area.

Map

Please provide a map, preferably a USGS 7.5 minute topographic quadrangle that shows, in detail, the boundary of the City's service area. This can also be done in electronic form if you desire.

Additional Information

Also, please supply the City's Public Water Supply Number (PWS#), that has been issued by the Department of Environmental Quality and the name and phone number of City's authorized agent, such as the mayor.

The City of Pierce happens to be in the Salmon-Clearwater River drainage, which is now considered a sensitive basin. Idaho Code 42-203A(5) requires IDWR to evaluate the attached criteria for applications to appropriate water. Please review the attached, seek comments from the Department of Fish & Game, the Department of Environmental Quality and the US Forest Service if applicable and respond to Rules 40.05 c. through 40.05 g. on page two and submit the information to IDWR within the next 30 days.

COPY

Once IDWR receives this additional information, processing of the application can continue. If you have any questions, feel free to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
