April 28, 2008

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
7600 Mineral Drive
Suite 100
Coeur d'Alene, Idaho, 83815

Attn: Robert G. Haynes P.E.

Dear Sir,

Please let me bring to your attention an incorrect statement, in Mr Richard Villelli's letter to us, 19 March 2008.

"There are two items we would ask you to consider. The overflow pipe we installed is for the same purpose as was the old overflow. Our reason for changing it was so it would no longer wash out the road to your house and the wood bridge that it flowed under and to prevent fish from escaping by that overflow which is what fish and game asked of us many years ago."

Please note, that Mr Villelli did not own the land our access road crosses until 2002-03, when Joe Villelli put the culvert and fish trap in, and it was on dry land. Therefore, I questioned Joe about the reason, at the time, and the exact purpose, since I did not recognize the metal fish trap or how it was to be used. Previous letters to you have shown that the ditch resulted from timbering by the Mead family and a dispute over the road, which ended in a lawsuit, in my mother Romola Dodge's favor.

Once again, I state there was no water or flooding to our road. Our cabin, built in 1905, is on a high piece of land and has never been in threat of water damage or flooding.

Enclosed please find a picture of my uncle, Clarence Leavey, with the first

log for the bridge, which he had to drag down to the road with his car. He had no heavy equipment to fill in the trench and could think of no other way to make the road passable.

Also, find a picture taken in 1934-35, of Wright Lake, and the road north to Eastport, Idaho. Behind the tree is a straight line which is actually the dike, Mr David Hutzberger, put in to protect the large meadow. He lived where the Abby family's RV Park is now located. On the other side of the tree, in the distance, is the far lake. The meadow is the area the Villelli family has now dredged for a lake. This picture was taken by my mother, on a mountain rock when she, my aunt LaVonne, and her friend were hiking. You will remember from my previous statements, that my grandparents, Charles and Lillian Leavey lived in the Wright home, where they rented during the Depression years. This is the site where the Villelli house now stands, so I have a well documented source of pictures, of the area and it's history.

Also enclosed, is a short history of the people who owned property in the area during the 1920's and 30's. I have also enclosed three signed statements regarding the wood bridge. They are from:

Larry R. Williams Jr.

Mrs. Tina Williams

Brian M. Lundquist.

Please place these in our file of protest.

*Thank you,
Sincerely,*

1948-49 My uncle, Clarence Leavoy, with the first log he dragged down to the ditch on the access road into our cabin. In a dispute, the Mead family tore out the ditch so the road could not be used. In the far background is melting winter snow pack. The meadow behind the car is clear of any water & fenced. The bridge was built on this dry rocky land. The Fish & Game Department was never involved since there were no fish.

ADDIE, IDAHO HISTORY---

5 JANUARY 1920 US FEDERAL CENSUS----taken at--EASTPORT PRECINCT, BOUNDARY COUNTY, IDAHO

HELMER M. DAHL--62 widower--born in Norway and came to this country 1888, naturalized in 1895--
tailor

Son--JAMES DAHL--30--born in Norway--carpenter--came to this country 1889

Helmer owned our cabin and sold it to Rod Hoagland.

DAVID HUTZBERGER--58--born in Pennsylvania--Flour Miller by profession--in 1910 was farming in
Kansas. (People called him Huntzie and he built the dyke on Wright Lake.

Wife--Sadie--43--born in Pennsylvania

GEORGE WRIGHT--28--born in Ireland--came to US in 1912, naturalized in 1910---He was plater at the
Shipyard before coming to Idaho.

Wife--Ella--18--born in Michigan

(Wright Lake, on the Vilelli Land was named for them.

5 APRIL 1930 US FEDERAL CENSUS---ADDIE, BOUNDARY COUNTY, IDAHO,
PART OF PEND O'REILLE NATIONAL FOREST

DAVID W. HUNTZBERGER--67 yrs--widower--born in Pennsylvania---lived to be an old man, but couldn't
find his death date. Lived in a cabin where Abby's land is.

ROBERT M. CRAWFORD- 50yrs --born in Pennsylvania---Owned the Grocery Store, now called Good
Grief Café. He and wife lived upstairs

Wife--SARAH D. CRAWFORD-51 years--born in Montana---She was the ADDIE IDAHO POST
MASTER, in the Grocery Store.

RODNEY B. HOAGLAND (RODERICK)--50yrs--born in Iowa

Son- Harlan E Hoagland- 25yrs- born So Dakota

Dau-in-law-Violet M Hougland--19yrs--born in Washington

Rod and Harland listed as timber contractors. Its about that time that a lot of old growth timber was cut
off my land. Rod being a close friend of my family, sold the forty acres and cabin to my uncle, Clarence
J. Leavey.

Glen L. Woodberry--28 born in Minnesota--truck driver

Wife-Lilah J.--24--born in Oregon

These folks were friends of my grandparents, Charlie and Lil Leavey, who later in the 1930's lived on
the "Wright Place", and farmed it until 1936/37, when they returned to Spokane, Washington. That is the
section where Richard and Marie Vilelli live at this time. Charlie and the boys farmed the back meadow,
which is now flooded and swampland. There was a large hay barn on the Wright-Hoagland line, which
housed the cow and hay. Since it was the end of the Depression, people lived off the land and since my
grandfather was a professional gardener, he was able to produce all the vegetables needed. Grandma
canned venison, vegetables, and berries so they could make it through the winter. Many breakfasts were
Supplemented with fresh trout.

Notice of Protest for permit # 987859

Dear Sir,

As a child, in the 60's, I remember driving across my uncle's wooden bridge on our access road. In 1984, when I returned from military duty, I went up to the cabin with my grandfather, Adrian B. Dodge, and helped him replace the planks on the bridge. It covered a three foot deep ditch, with about 10 to 15 feet on either side of the bridge. The ditch had rocks scattered in it, but no water.

After my grandmother's death, in 1997, I replaced some broken planks on it, so cars could safely travel over it. In 2000, my friend, my wife, and I replaced the whole bridge. We brought up a horse trailer and decided it wasn't wide enough or strong enough for the weight. We rebuilt the bridge by using railroad ties, 2x6's and 2x4x10, also reinforcing the strength with two truck loads of large rocks and boulders, under it and three to four feet on each side for stability. There was no water involved.

There has never been water in that area, let alone a trench cut to the meadow or through the woods to Round Prairie Creek. Until the Vilelli family broke open the dike holding back Wright Lake, to flood the meadow they purchased from the Mead family, there has never been water in that area, or a threat of flooding to our property. Also, our families access road never had the threat of any type of flooding, or the need for a culvert to replace our wooden bridge.

I hope this clarifies my mother, Doreen William's statements about the access bridge, pictures, maps, and copies of our deed attached to our families protest.

Sincerely,

Larry R. Williams Jr.

Attention: Robert Hayes
Notice of Protest for permit# 987859

Dear Sir:

After getting together with Larry Williams Jr., in October of 1989, we would go up to his grandparents, Adrian and Romola Dodge cabin property in Idaho every summer, then it became their daughter, Doreen Williams, property.

After we were married in 1994, we would go up there every year for spring break and summer vacations to do work on the property, i.e., mend fences, replace boards on the bridge that goes to the cabin, clear the trees out of the pasture; fix, replace, repair or add anything that needed to be done to the cabin or property; and have some fun recreational time with the family.

In the year 2000, I, my husband; and his friend ended up replacing the whole bridge because we did not think that the bridge was wide enough, or strong enough to have a loaded horse trailer go over the bridge, which had never had water under it. (It is a large ditch.)

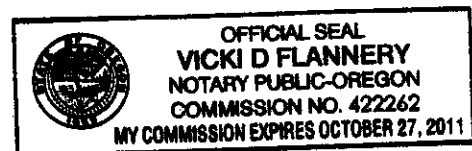

When my children and I first went to the cabin with Larry, there is a pasture and home on the east side of the property, which had 2 horses on it. There was no form of water on that property.

The only source of water on or around the cabin property was a lake (Right Lake) to the north east side of the property and a creek (Round Prairie) that ran through the property (north and south) that is west of the cabin.

Sincerely,

Tina H. Williams

Notice of Protest for permit # 987859

Dear Sirs,

For the past 10 years, I have been vacationing with Mr. Larry Williams at his family's property on Round Prairie Creek. I have helped the Williams family in maintaining there property by installing new gates and fence as well as general maintaince on the cabin.

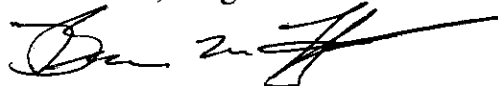

The adjacent property owned by one Richard Villelli had a small lake 2 ½ to 3 acres in size known as Wright Lake. Wright lake also had a small earthen dam on the southern edge to contain the lake to the size mentioned. Along the access road there was a small cut, or ditch approximately 10 feet wide and 3 feet deep. There was a wooded crossing over the ditch that was filled with rock to allow use of the access road. To the east was a marshy area about 250 yards away that at the time was fenced off by the then owner Tim Mead. This was, I believe to keep his horses out of the marsh.

Several years ago, Tim Mead sold the property to the Villelli family and some development started to take place. A large earthen dam was build to the south of the marsh. The dam was approximately 150 yards long and 10 feet high by my best estimates. The earthen dam at the southern edge or Wright Lake was missing or removed and the lake was now 12 to 15 acres in size... A culvert about 3 feet in diameter had been placed where the wooden crossing had been and a catch basin installed on the eastern edge of the culvert. I talking to Joey, Richard Villelli's son he stated the culvert was to stop the flooding and the catch basin was a fish trap so his father's fish did not escape to the river. Also noted was a marked reduction in stream flow in Little Round Prairie Creek. This, I believe was due to the fact that water was diverted from the creek to the lake. In farther talking to Joey, he stated that the new dam was leaking and they were having problems with maintaining the water level...

Last year, noted was an excavation of the lake with a track hoe to increase the depth of the lake, and establish a permanent boundary for the impoundment. At the culvert a ditch had been farther cut through the forest to intersect the creek down stream of the Williams property. The new ditch is approximately 6 feet deep and 10 feet across, and extending some 300 yards to the creek, which would allow drainage from the lake.

Sincerely
Brian M Lundquist
