Re: WATER RIGHTS
Number: 71-4055B
Number: 71-10854

Dear Ms. Jones:

Reference is made to your letter to me of May 2, 2008, a copy of which is attached.

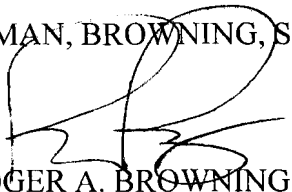

Enclosed please the application you drafted regarding the transfer of above two water rights, which has been signed by Katherine A. Browning and me before a notary public. Also enclosed is my check in the amount of \$250.00 for the filing fee.

Please file the transfer application and provide us with the appropriate confirmation.

Very truly yours,

GLASSMAN, BROWNING, SALTSMAN & JACOBS, INC.

Dear Mr. Browning:

Please find enclosed a water right transfer application that you recently submitted to our office. The application apparently seeks to add diversion points to rights 71-4055B and 71-10854 from Goat Creek. Also enclosed is the filing fee (check # 1440 for \$250.00) that was submitted with the application. As you recall, you recently had a telephone conversation with Corey Skinner and I regarding your proposed diversions for these two water rights. The enclosed application that you filed with our office does not adequately describe your desired changes.

As we discussed, I have drafted the enclosed transfer application (# 74777) that should accomplish what you described during our telephone conversation. This particular application will add the Browning Pump # 1 location and the GC5 headgate as additional authorized points of diversion from Goat Creek for rights 71-4055B and 71-10854. This will allow you to divert water from Goat Creek from any combination of the three described locations via these two water rights. Note that the GC5 headgate is described as the point of diversion from Goat Creek because it feeds the ditch where the Browning Pump # 2 is located.

Hopefully the enclosed draft application is understandable. The first page of the application summarizes the application, the second page is the signature page where you and your wife can sign the application before a notary, pages 3, 4, 5 and 6 describe the two water rights prior to the proposed change (only listing the GC6 diversion), and pages 7 and 8 describe how the two rights will look after the proposed change (listing the GC6 diversion, Browning Pump # 1, and GC5 diversion as authorized diversion points). A map showing the proposed diversion points and the authorized places of use is included as part of the application.

If the enclosed draft application (# 74777) describes what you are hoping to accomplish then you and your wife can sign the application before a notary and return it to our office with the \$250.00 filing fee. If you have any questions regarding the application, or would like to discuss this matter any further, feel free to contact me at your convenience.

Sincerely,

Jana M. Jones
IDWR Water Agent
