Attention: Steve Lester

Subject: Eagle Springs Ranch, LLC Amended Application for Permit No. 65-23105

Dear Steve,

Enclosed on behalf of our client Eagle Springs Ranch, LLC and their development partner Barnes Ventures, Inc is an Amended Transfer Application No. 73787. This application corresponds to the amended Permit Application 65-23105 submitted in November. The transfer changes portions of decreed water rights from irrigation to aesthetic uses to balance the ponds and water features proposed in application 65-23105.

As with the original transfer application, this one is filed jointly between Eagle Springs Ranch, LLC and Barnes Ventures, Inc. Ownership of the parties' respective water rights will not change by this transfer. At some time in the future, I anticipate that water right ownership will be conveyed to an appropriate encompassing entity for the developed subdivision, such as a homeowners association.

The prior application stipulated that portions of Barnes Ventures, Inc water right numbers 65-8850 and 65-11324 were excluded from the transfer application. This application now includes 100% of these rights.

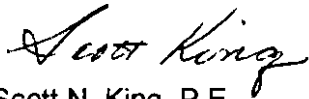

Two maps are included with this submittal. One is on 8.5" x 11" at 1:24,000-scale showing the proposed changes and indicating water right places of use for irrigation and aesthetic in ponds and streams. The second map on 11" x 17" at 1:12,000-scale was submitted with the amended permit filed in November, but is also included with this submittal for clarity. Corresponding with this map is a table listing pond surface area, depth, and volumes.

December 27, 2007

Please provide copy of all written communications and notices regarding this transfer application to Scott Campbell, counsel for Barnes Ventures, Inc.

We look forward to the department's review and advertisement of this application. Please contact me with any questions or requests for additional information.

Sincerely,

Scott N. King, P.E.
Senior Project Engineer
