

MEMORANDUM

Date: March 11, 2008
To: Transfer 73596
From: dcarlson
Re: transfer evaluation

This transfer proposes to move one of the points of diversion upstream to another existing location. Stop using the current pod. The place of use for 23-80 was decreed incorrect. The place of use will be corrected to decreed place of use of 518.4 acres. Landowners at the new point of diversion agreed with this transfer. The location of the new pod is in NWSE based on GPS/ arc view. The combined 13.4 cfs condition is not needed, because thats what the water rights would add up to.

Authority to File:
Applicant is the owner of record as far as the SRBA decree.

Water Right Validity:
This water right was decreed in the SRBA in 2005. Forfeiture is not an issue.

Injury to Other Water Rights:
In water district 01. Will request watermaster comments. Moving point of diversion upstream, no diversion between the old and new pods.
Transfer will be advertised to determine any protests.

Enlargement of Use:
There is no evidence of enlargement of use.

Local Public Interest:
No issues identified.

Beneficial Use / Conservation of Water Resources:
No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
