

MEMORANDUM

Date: May 09, 2008
To: Water Right File 75-14467
From: medl
Re: permit review

I copied the Application POU into the Permit layer but copied the Spatial Data point from GPS by BLM to the Permit POD.

The watermasters opposition to this permit based on sufficiency of supply had not been addressed. I phoned ECarlsen in the Eastern Region office and asked for a memo addressing the watermasters concerns.

A condition will be added to this permit to provide guidance on its combined use with decreed rights 75-21 and 75-19D (which is claimed in SRBA as 75-19G).

As of this memo 75-19D and 75-21 have been decreed. 75-19D was claimed in SRBA as 75-19G and 75-19G has not yet been decreed.
