**Subject:** Simplot pump in the Snake River

Jim,  
Thanks for coming to visit earlier this week to discuss the historical usage and subsequent permitting for the irrigation/dilution water pump located in the Snake River. I have spoken with an ex Simplot employee about the historical use of this water. They used the water in two ways. First, the water was used to irrigate the land. This occurred after Simplot was instructed not to irrigate the land with water from the Industrial Wastewater Treatment Plant (IWTP) clarifier. The second use was to provide water to dilute the discharge from the IWTP before it discharged to the Snake River. The ex Simplot employee I spoke to reported that they did not irrigate the land with a combined IWTP and dilution water mixture. Please let me know if you need any other information. Thanks.
