

## MEMORANDUM

**Date:** April 24, 2008  
**To:** Transfer 74745  
**From:** Jana Jones  
**Re:** Evaluation of Sufficiency of Information Submitted

---

Application proposes modifying Transfer #72524 (approved 4/29/2007) by changing points of diversion and authorized place of use of three stock water and commercial groundwater rights (36-16468, 36-16470, 36-16472) to reflect the new construction plan for the proposed dairy operation. The general location of the proposed dairy site is approximately 4 miles north and 6.5 miles west of Paul. Location of the two new wells to be drilled will be moved south (adjacent QQ) and will still service the dairy. The application involves a point of diversion change within the ESPA and Water District 130. However, the current and proposed points of diversion are located within the same model cell so a ground water model analysis is not required.

· **Authority to File:**

The applicant has provided warranty deeds for the lands and appurtenances.

· **Water Right Validity:**

The rights involved with the transfer have been decreed in the SRBA and were recently involved in Transfer #72524 (approved 4/29/2007).

· **Injury to Other Water Rights:**

None anticipated.

· **Enlargement of Use:**

None anticipated.

· **Local Public Interest:**

None anticipated.

· **Beneficial Use/Conservation of Water Resources:**

Proposed uses are recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
