To: Water Right File 65-23114
From: medl
Re: overlaps again

Garden Valley School District is listed as the owner of the following: Water rights 65-11403, 65-11409, 65-12560 and Permit 65-13834.

As part of the application review process for this permit, (65-23114), I did a place-of-use comparison. That query of the IDWR database showed that three more water rights appear to be on school district property. The additional water rights are:

Water right 65-10286, which was decreed to J T Tucker,

Water rights 65-7755 and 65-9672 which were decreed to John T Tucker.

The water rights listed above do not preclude the school district from appropriating additional water. But because this is an unusual number of water rights, I asked Mr. Bob Grimm, the school districts maintenance supervisor, to take this opportunity to clarify the place of use for each of them. Having that information will be helpful when the time comes to license this permit.
