- Quantity and quality of return flows and location of discharge:
Historical discharges to Clear Lakes (treated processing water and cooling water)
Maintained-only source water changes. Historical discharge to creek maintained.
- Describe the effects on other water uses resulting from the proposed change:
Flow in Clear Lakes increased by amount of groundwater diversion. Other water users
Along the creek flowing from the associated spring will experience no disruption due
to continued diversion and discharge to match historical pattern.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willful misrepresentations made in this application may result in voiding its approval.
