RE	Amending APPL	

Discussion with Attorney Jeff Feraloy:

1) add div. to storage, mini storage, mini from storage (exceeds 24-hr. fill idea)

2) delete items 8b + e (stock & inventory) since not separate beneficial uses in item 4

3) confirm water bearing zone for existing & proposed wells

4) Address issue of possible surface water to be stored in ponds - said does not want that, would interfere with their design, etc. Resolve by noting in item 6b that would be excavated ponds, no dams.

Also law firm willing to have extra copies of Appl. with supporting info available if requested by FOWR.
