Subject: Application for Permit – BSU Cooling Well

Dear Steve:

As a follow-up to our meeting with Tim Fearnside, Jan Shurte, and Sandy Egbert on July 24, I have enclosed an application for permit seeking 0.42 cfs of groundwater for cooling use. The cooling use consists of non-contact cooling through a chiller system for air conditioning of three buildings. The proposed diversion rate is based on installed pump capacity in the existing Liberal Arts Well.

The cooling use has been on-going since the mid 1960s. The 1960s use is documented by an August 1967 report by Anderson & Kelly describing an investigation of well interference between three cooling wells then in use at the campus. The enclosed application seeks to use the Liberal Arts Well as a point of diversion. The other two wells described in the report (Student Union and Library) have apparently been abandoned.

A check for the \$250 filing fee is enclosed. Please contact me with any questions.

Sincerely,

Terry M. Scanlan
