

## MEMORANDUM

**Date:** April 04, 2008  
**To:** Transfer 74646  
**From:** jlarsen  
**Re:** Transfer Evaluation

---

This transfer proposes to change the place of use for three stacked water rights. This will be accomplished by drying corners around pivots and moving POU to currently unauthorized acreage under existing and planned pivots.

**Authority to File:**

Applicant is the owner of record as shown by a partial decree in the SRBA court on 31Jan2002. Northwest Farm Credit Service holds a lien against the property but agrees to the changes as shown by a notarized statement in the file.

**Water Right Validity:**

This water right was partially decreed in the SRBA on 31Jan2002 and aerial photos show the property being irrigated in 2006. Forfeiture is not an issue.

**Injury to Other Water Rights:**

In Water District 120. Watermaster will comment.

The transfer is only increasing the number of acres permitted in several QQs while removing an equal number of acres from other QQs. The nature of this transfer does not require running the ESPA Model. Because there will be no hydrologic change this transfer will not be advertised.

**Enlargement of Use:**

There is no evidence of enlargement of use. An equal number of acres will be removed from irrigation to cover the new allowable acres.

**Local Public Interest:**

No issues identified.

**Beneficial Use / Conservation of Water Resources:**

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

## MEMORANDUM
