Re: Water Right Application 79-14202

Dear Mr. Clay:

Attached is a copy of a water right application that may be of interest to you. The Department of Water Resources (Department) has received comments from the Idaho Department of Environmental Quality (IDEQ) and the Idaho Department of Fish and Game (IDFG) as a result of requests for comments from the water right applicant. The IDFG indicated in their response they will recommend fish screen conditions for the Encroachment Permit the applicant will request from your agency prior to installation of the waterline and pump for this project. The Department wanted to give your agency the opportunity to comment on this water right application prior to further processing due to the fact that the IDFG indicated your agency will be involved in regulation of this project at least in the initial phases. Please review the application and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter. However, if your agency desires to file a formal protest against the approval of the application, your written protest along with the \$25.00 protest fee, must be received in this office by May 5, 2008.

If you have any questions regarding the application, please contact this office at 334-2190.

Sincerely,

Angela M. Grimm
Water Resource Agent
