Re: Application for Permit No. 63-32238

Dear Applicant:

This letter seeks additional information for your proposed wildlife project. Additional background information prepared by the Idaho Department of Water Resources (IDWR) is enclosed for your consideration.

IDWR seeks additional information to evaluate the application for processing to continue. Previously you supplied most of the necessary information. One other item needs to be addressed. A copy of your application is enclosed for your convenience.

Please provide information establishing a credible link between the amount of water to be diverted and the specific beneficial uses to be developed. Why is 30 CFS required for the project? Exactly what beneficial use will be provided for wildlife? Determine why the requested amount of water is not speculative.

Any credible information that is provided should be attributed to the person or entity supplying the information. This should include verification that the person or entity is qualified to provide that information.

After receiving the additional information from you, IDWR will consult with other natural resource agencies to evaluate the information. Processing of the applications will continue after that step is completed.

The additional information should be provided within the next ninety (90) days. Alternately, you may request up to six months interruption in processing. The applications will be voided under IC § 42-204 without a timely written response.

Application for Permit No. 63-32238
