

MEMORANDUM

Date: March 19, 2008
To: Water Right File 67-14787
From: nvandyke
Re: S.O. Review

Application seeks to divert 0.08 cfs groundwater for 4 acres of irrigation just southeast of Weiser. Region review showed no overlap with other rights however it appears that this rights pou overlaps with recommendations 67-11178 and 67-498 that are irrigation. The current owner of these two recommendations Wayne Aldrich was previous owner of 4 acres this permit covers. Per a telephone conversation I had with permit applicant Denise Armitage on 3/31/2008, Aldrich removed all water delivery system from these 4 acres when property was conveyed to her. There is no irrigation system currently on these 4 acres. This was originally going to fall under WD67 jurisdiction however applicants proposal on well construction alleviated hydraulic connection concerns. See previous comment left by Steve Lester.
