

MEMORANDUM

TO: Robidoux Application for Permit

FROM: KAY WALKER *KW*

RE: Amended Application

Date: March 20, 2008

.....

I met with Alan Sands on March 11, 2008, to discuss this application pursuant to my letter of 2/12/2008. He showed me how the ponds were all connected on the map attached to original application. The ponds can all be considered one system. He had also made requested corrections to the copy of the application that I had sent to Mr. Robidoux. Mr. Sands had not spoken to BLM regarding the diversion on their property at the time of this meeting. He did ask me if it would be a problem to omit the diversion from BLM property if they found they could develop a ditch between West 1 and West 2 ponds. He took his copy of the application with him to discuss the right of way with BLM.

On March 17, 2008, Mr. Sands came back into the office to submit an amended application. They had surveyed the lands between West 1 and West 2 and decided to omit the diversion from the unnamed stream that was located on BLM property. The amended application contained requested modifications and appears to be in shape to data-enter and advertise now. The amended application did not increase the amount of water to be utilized so there should be no change in regard to the priority date.
