Subject: Re: Draper Pond

Megan -

Thank you for your prompt attention to this matter. I have a couple edits.

First, Draper is only required to provide temperature records of the outflow of his pond. I will, in fact, also be taking measurements at the two other sites, but only for my information. Naturally, if any water temperature issues should arise we would all probably look to the river temp at the Comstock Ditch headgate and the Graystone outlet for answers but, for reporting needs, only his outlet is required.

Second, its Fisher, no "c". Unless, you insist.
