Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. and Mrs. Endicott:

The Department of Water Resources (IDWR) is returning your recently submitted application for additional information and corrections.

In line item #4, the application indicates an instantaneous diversion of 0.08 cfs (36 gallons per minute) from a well that produces only 7 gallons per minute (0.02± cfs), according to the well drilling report. I have enclosed an example application form, which shows the corrections for your consideration, along with a new application form if needed.

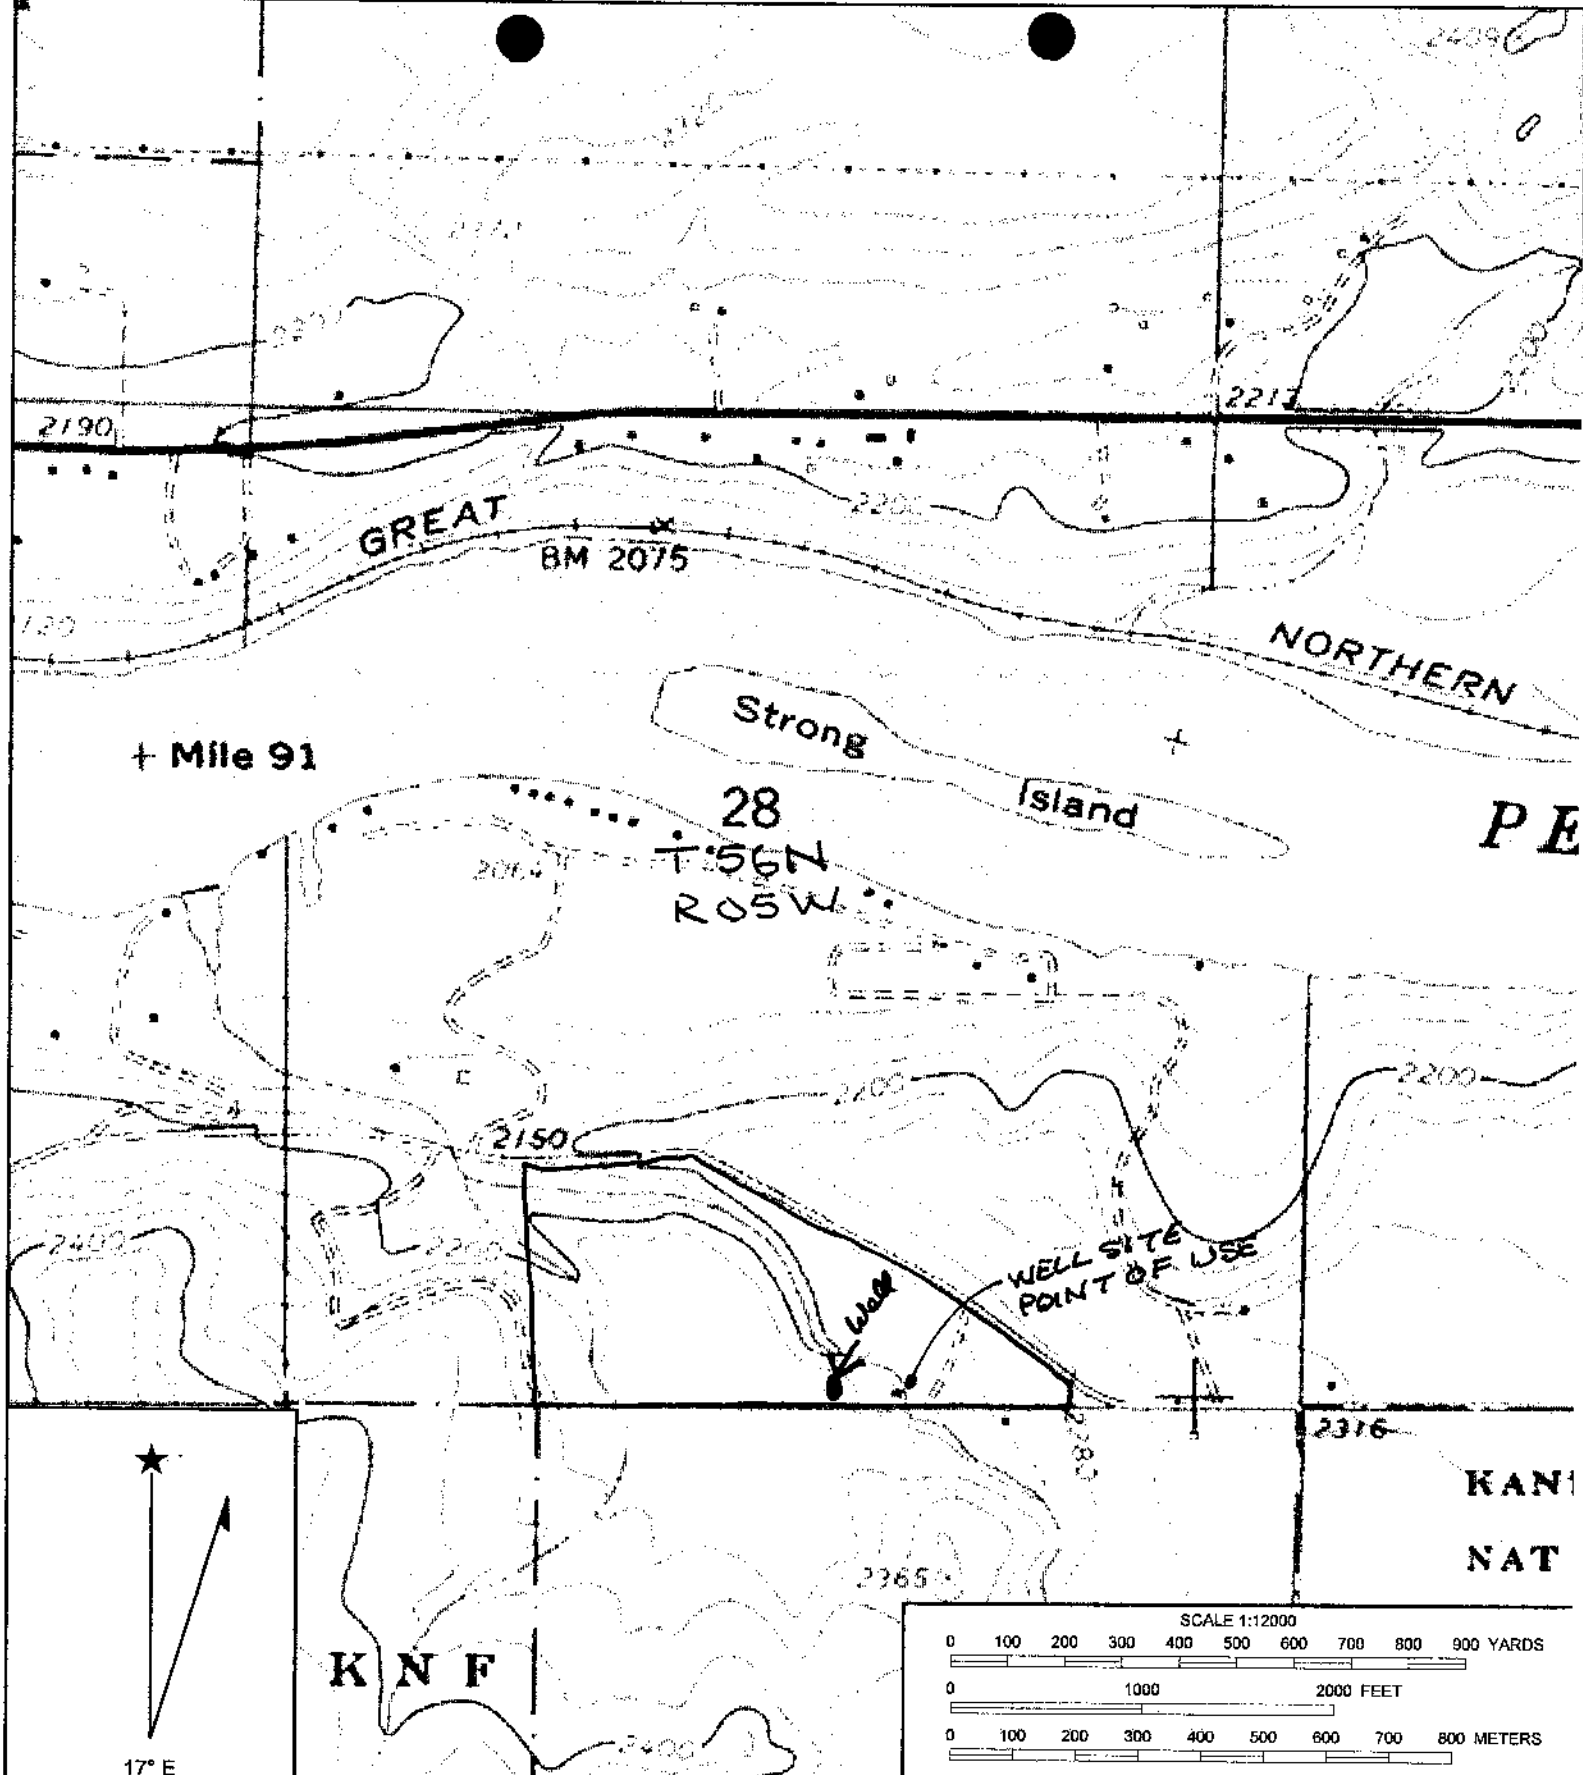

Please review the enclosed aerial photograph as to the location of your well and the place of use. If domestic water is to serve the barn located within the SESW quarter of the section, it will need to be indicated as shown in line item #9 of the example application form. If not, the place of use will only be in the SWSE quarter. Also, the original application indicates the well is located in two separate quarter quarters. From the submitted map, the well is shown to be located within the SWSE of Section 28. Please review the aerial photograph and verify the well's location as either a correction on the old form or on the new provided form.

Please make the necessary corrections to the returned application or complete the new form and resubmit as soon as possible so as not to delay processing. If you have any questions, don't hesitate to contact me at this office.

Sincerely,

Keith E. Franklin  
Senior Water Resources Agent  
Enclosure.
