Subject: Memo for App. 22-13709

Ernie,

I'm still hanging on to the Idaho Holdings LLC application (22-13709). Have you had a chance to think about your memo?

If I recall correctly, you were going to document your personal knowledge that the land where the ponds will be constructed is a wetland and, therefore, a one-to-one swap with pond surface area will not increase annual evapotranspiration, even if the land is not irrigated every year.

We were also going to accept some of Right 22-13247 as mitigation to keep the acres from being moved elsewhere, but we were going to reduce the offered mitigation to only what is needed. By taking only what is needed for mitigation, we can avoid a future request to reduce the mitigation because it was more than necessary.

Shelley
