Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. Bennett:

The Idaho Department of Water Resources (IDWR) is in the process of issuing a permit for your recently submitted application. Before the permit can be finalized an issue with the stockwater component of your application needs to be addressed.

Upon final review of your application IDWR discovered the amount of water requested for the stockwater diversion exceeds the amount normally allowed for eight animals. The application requests an amount equal to 0.03 cfs (13.5 gallons per minute) while the normal allowable is equivalent to 0.02 cfs (9 gallons per minute). If you desire the 0.03 cfs, please justify the need for that amount to the department or if you agree that the 0.02 cfs would suffice, please let me know in writing as soon as possible so as not to further delay your permit.

If you have any questions, don't hesitate to contact me at this office.

Thank you.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
