

MEMO: Transfers 73710, 73711, 73712

DATE: February 22, 2008

FROM: Jeanie Robertson

The attached email dated 4/30/07 from Jason Helms of Brockway Engineering and enclosed map shows that he addressed the concerns of the water master and that the acres she was concerned about will no longer be irrigated. The BLM did not wish the irrigation to continue on the south half of the pivot in the SENE and SWNE of Section 32 so Jason amended the transfer and left only 32 acres in the SWSW of Section 29 for authorized irrigation. I talked with Mr. Woodland today by telephone and he said that he will need to get with the BLM and see what they want him to do as the fence for his property includes those acres but apparently it is in the wrong place. He will not crop those acres even if some overspray happens.

Jeanie,

The three transfer applications related to the Woodland/BLM are ready for submittal and were sent to BLM for review. Apparently the BLM had decided it couldn't allow the continuing irrigation overlap that was occurring on the southern portion of the pivot so I revised those transfers to exclude that area from the PPU. The way I re-structured those, it may be possible to process the transfer of the portions of the water rights that belong to S&R Investments (26.7 acres of 36-2268A & 36-10090) to the Keco PPU since the acres are specifically chosen not to include any BLM property. I spoke with Maria Young last week and I am under the impression that BLM is reconsidering how it wants to handle this. I have left a message with the BLM office to determine the current status.

Thanks for moving these along and let me know if you need anything.

Jason

Jason,

Here are some comments on my progress and questions on these Young & Young things. (BTW, I can't seem to find my file on Transfer #72186, the companion to #72185, related to S9?) Guess it's on hold for now, but I'd sure like to know where the file is...Jeanie

Jeanie,

I believe if you can keep those dairy split and transfers at the bottom yet that would be appreciated. Did you ever prepare separate transfers to go along with the dairy transfers, like K102, K13, K14, D21, S9, or S24? I see some old emails that you were going to but I can't find that you did...no hurry on these I guess!

Any pending irrigation transfers / splits are much higher priority:

The Y&Y - Richard Young split and transfer (related to 36-7042, & 36-8775) **Sent this to Pam, Transfer #73520.**

Will still need to tweak the remaining rights after the approval.

The Mainline - Triangle Poteet split and transfer (related to 36-2258B) **Sent this to Pam Transfer #73505. Will still need to tweak remaining rights after the approval.**

The North Ridge - Youngs - COO and subsequent Woodland split and transfer (related to 36-2268A still in the name of Large? BLM involved here...)

I can only find a letter from Corey to you on 9/19/2005 that returned three applications and the check for \$870.00 cause there were some problems. Did you ever re-submit these?

The Y&Y - Whitesides split (related to 36-15612, et. al.) **Transfer 72135, I am starting to work on this one...**

Thanks,

Jason

Northridge, LLC - Large Property
BLM Water Right Split & Keco Transfer
