Re: Water Supply Bank Lease Applications

Anthony Miller confirmed that his intention is to have all of 63-31950 and 63-31952 leased to the Bank. He said that he recalled receiving something in the mail confirming that the rights were accepted into the Bank but his files are currently inaccessible. I explained that lease acceptance documents would be issued to properly document the water right file and for his verification. Anthony would like the rights leased to the Bank through 2015 as he has no intention of farming in the future. His current contact information is below
