Re: Application for Transfer No. 74509

Dear Roxanne:

Transfer processing is being expedited for the above referenced matter. The legal notice will be published in the last half of this month with an April 7, 2008 protest deadline.

Additional information is needed to complete the transfer processing. Right 65-7573 is considered valid because it was licensed last year. However, right 65-7290 was decreed in 2000, more than five years prior to the transfer application being filed.

Please provide credible information verifying beneficial use under right 65-7290 within the five year period preceding the application. That period includes 2003 through 2007. Perhaps IDEQ records for the public water system or other similar data are available for this situation.

Please submit the requested information for application processing to continue. The applicant may seek additional time to provide the information by making a written request to interrupt processing for up to six months. A response including the requested information, or a request for more time to seek the information, must be received within thirty (30) days. **Without a timely reply, IDWR will issue a preliminary order to reject the application. The application fee will not be refunded for a rejected application. A rejected application may be re-filed when adequate information can be provided.**

Please let me know if need more information. Thank you for your attention to these matters.

Sincerely,

Steve Lester  
Water Rights Supervisor
