Hello Dave:

Thanks for getting me the information on Tom Walsh the other day.

I have another question regarding the transfer for Bill Shurtleff. He has some water coming from the Glen Bills diversion going into section 8 in T1N of 44E 136 acres

The actual location of the Bills diversion is T2N R44E Section 33 NWSWSE. In the application that I submitted this water and POD will be unchanged I just want to make sure Bill can still divert water from this point of diversion. In the application I specifically stated that it would remain unchanged.

Bill called me this morning and based on my review of the application I believe that we are OK because I made sure the water in section 8 was unchanged.

Just wanted to check with you to verify that we are on the same page.

Appreciate you help, thanks much!
Matt
