Re: license review

While reviewing this file for licensing, I found the following worth noting:

Neither the POD nor the POU shapes had been created prior to my review. I created them based on the field exam notes and Kootenai County taxlot information. Although the 1.2 acre POU shape that I created appears to bleed into the Twp50N Rge05W sec3 and sect 10, I believe that in this location the projection of the section lines may be off a little. Section lines and roads usually coincide and based on an examination of the section grid in relation to the road in this area, there is reason to believe that the true section line is further west than is indicated in the projection. Assuming that to be the case, the POU for this license is not actually in sections 3 and 10.

I made manual data corrections to the POU in the license document, eliminating 0.1 acre from section 3 and adding it to the 0.9 acre in section 2. With that change, no amendment will be needed to correct the POU location.
