To Whom It May Concern:

I am writing in regards to water right # 63-7270 B. I submitted an application for a transfer from irrigation use to livestock use in July of 2006. I am requesting that this transfer be expedited in order that we might move ahead with the construction and operation of our new dairy facility. Our conditional use permit from Ada County stipulates that we must have our transfer of water complete before they will grant us final approval. Also, this places an additional economic burden on us until we can construct and operate our new facility. Thank you for your consideration on this matter.

Sincerely Yours,

Glenn Vander Woude
