Re: Transfer Evaluation

This transfer proposes to change the point of diversion and place of use for 1 acre and 0.02 cfs of water right 22-13584. This is daughter of right 22-13584 of which a portion was bought by the new owner to be moved to recently purchased property. A new well will need to be drilled. During a meeting between IDWR and the applicant it was determined that the water right being transferred should be considered primary. A synopsis of the meeting is in the file as a memo authored by Kristen Moore.

Authority to File:

Applicant has produced documentation showing the purchase of 0.02 cfs of water right 22-13584 dated 19Oct07.

Water Right Validity:

This water right was licensed in 1995 and the aerial photos from 2004 show it to be irrigated. Forfeiture is not an issue.

Injury to Other Water Rights:

Not within a Water District.

Transfer will be advertised to determine any protests.

Enlargement of Use:

There is no evidence of enlargement of use.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issue identified.

Review of the application finds there is not clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
