

MEMORANDUM

Date: January 25, 2008
To: Transfer 74110
From: bwalker
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes changing the place of use for a 9.4 acre portion of two water rights diverted from the South Fork of Rock Creek and used to irrigate 112.0 acres on a farm located approximately 3.5-4.0 miles South and 1.0-2.0 miles East of Rockland on the Westside of HWY 37. This transfer proposes changing the place of use of 9.4 acres for a new partial center pivot being added to the system that will pick up the additional acreage. The ground being dried up, (9.4 acres) are areas beyond the proposed pivot and two other existing pivots. The source and point of diversion will stay the same. Note that the decreed right had a unique measurement device requirement that I carried forward in the transfer.

· **Authority to File:**

The applicant is listed as the current owner of the rights being transferred according to IDWR records.

· **Water Right Validity:**

Both of the rights, 41-8F and 41-10265 were decreed in the SRBA on March 12, 2001. Forfeiture does not appear to be an issue.

· **Injury to Other Water Rights:**

None anticipated.

· **Enlargement of Use:**

None anticipated.

· **Local Public Interest:**

No negative impacts anticipated.

· **Beneficial Use/Conservation of Water Resources:**

Proposed use is recognized as a beneficial use of water. A sprinkler system will be used for irrigation.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
