Re: Application For Permit to Appropriate the Public Waters of the State of Idaho,
Timothy & Patricia Greene.

Dear Mr. Landeck:

The Idaho Department of Water Resources (IDWR) is returning two applications for permit recently submitted on the behalf of Timothy and Patricia Greene for clarification, corrections and additional information.

For your review and consideration, I have enclosed two example applications for each pond that contain the necessary information to complete the applications.

Item #2 Source of Water Supply

NW Pond: Earlier this year when I met on site with Mr. Greene, he indicated the source of water for the northwest pond was a spring, rather than run-off water as indicated on the application. If this is true, please make the correction on the original application and indicate what body of water the spring is tributary to, such as an unnamed stream as shown on the example.

NE Pond: Please indicate the body of water the unnamed stream is tributary to, such as the Palouse River as shown on the example.

Item #3 Location of the Point of Diversion

The point of diversion for both ponds is the dike or dam that impounds the water.

NW Pond: IDWR's data base indicates the point of diversion is located in the NESWSW of Section 1 rather than the SWSE as indicated on the application. Please make the necessary change on the original application and initial each change.

NE Pond: The department's database shows this point of diversion is located in the SESESW rather than the SWSE as indicated on the submitted application form. Please make the necessary correction.

COPY

Also, please indicate which county the property is located on each of the applications.

Item #4 Water Use and Purpose

Each application should list the purposes as shown on the examples. Also, each submitted application indicated a pond capacity of 1.6 to 1.9 acre-feet. I suggest indicating a 2 acre-foot pond capacity. The actual will be determined when a field exam is completed.

Item #6 Proposed Diverting Works

Please complete 6(b) on the application form and correct the remainder as per the example.

Item #7 Time for Completion

Please complete both applications as per the examples.

Item #8 Descriptions of Proposed Uses

Please complete 8(e) as per the examples.

Item #9 Place of Use

Please complete this section for each application as per the examples.

Item #10 Other Water Rights

Please complete this section. If there are no other water rights, so indicate.

Item #11

Please complete both a and b of this section.

Once the department has received the corrected or new application forms, processing can continue. If you have any questions, feel free to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent

Enclosure
Cc. Timothy Greene
