Re: Permit 98-7825 - Proof Notice Due

Dear Deborah:

This letter is in response to your letter of January 31, 2008 requesting that we complete an attached Proof of Beneficial Use Form. With this letter are the completed form and a check for \$175.

As we discussed by phone, the 3.8 CFS water right was applied for because of future anticipated municipal use within the City of Bonners Ferry. The previous City Engineer, Mike Woodward, prepared a study that showed an anticipated future need of 3.8 CF. The City still believes that study to be accurate for planning purposes. The attached information was located on the IDWR website.

The water main that serves the City from Myrtle Creek is 7 miles long and 16-inches in diameter. Hydraulically, the main cannot deliver the additional 3.8 CFS until a larger main or pump system is installed. The City will likely complete that work when growth and need dictates. Thank you for your help, and please call if you have any questions for me

Sincerely,

Mike Klaus, P.E.
City Engineer
City of Bonners Ferry
