RE: Request to conduct field examinations for Permits 37-8813 and 37-8814

Dear Dr. Brockway:

The Department of Water Resources received examination fees in connection with the proofs of beneficial use for Permits 37-8813 and 37-8814, and IDWR intends to conduct the field examinations when personnel and resources are available. However, if you can conduct field examinations sooner than IDWR can conduct them, IDWR will welcome the assistance.

By copy of this letter, I am notifying Allen Merritt in IDWR's Southern Regional Office that you intend to conduct the examinations. If you do not conduct the field examinations for any reason, please notify me or Allen Merritt right away.

In your letter you mentioned that your client wants to establish a permissible place of use for the entire facility. The field reports and licenses, if issued, must represent the development established in connection with the permits during their respective development periods. If the permitted water uses were not developed as permissible places of use, your client may have to file an application for transfer to modify the rights when/if they are licensed.

If you have any questions, please call me at 208-287-4947, or email me at shelley.keen@idwr.idaho.gov.

Sincerely,

Shelley W. Keen
Water Rights Supervisor
