RE: Beneficial Use Exam - Water Right Permit # 37-8813, 37-8814

Dear Shelley:

The beneficial use exam for the above water right has not been completed even though the proof was filed in 1993. The permit holder is very anxious to complete the licensing of this water right and has asked Brockway Engineering to facilitate that completion. Therefore, Brockway Engineering is seeking approval from IDWR to complete the field exam for the said permit in order to facilitate licensing. The owner would like to move forward with the licensing in order to schedule the water facilities for new development. In addition the permit holder would like to create a permissible place of use for the entire facility.

Please respond to this request as soon as possible so that we can proceed with the field exam. Thank you for your attention to this matter, and if you have any questions please do not hesitate to call our office at (208) 736-8543.

Sincerely,

Charles E Brockway, PHD, PE
