Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. Bloomsburg:

The Department of Water Resources has received your amended application for permit; however, you added stockwater as a purpose, with a diversion of 2.0 cfs for 25 head of beef cattle and indicated a diversion of 8 cfs for the irrigation of 4 acres. The allowable diversion for 25 head of stock is 0.02 cfs (18 gallons per minute) and 0.12 cfs (54 gallons per minute) for the irrigation of 4 acres.

To save a lot of time, I have enclosed a computer-generated application that includes the appropriate diversions for the purposes you have requested, along with a site map. Please examine the application and if it's satisfactory, sign and return it to me as soon as possible so as not to delay it's processing. If you have any questions, don't hesitate to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent
