Re: Application For Permit to Appropriate the Public Waters of the State of Idaho

Dear Mr. Bloomsburg:

As per my telephone conversation with Mrs. Bloomsburg on October 15, 2007, the Department of Water Resources is returning your recently submitted application for additional information and corrections.

I understand you are planning to irrigate lawn, garden and grounds within the trailer park. If so, an irrigation component must be added to your application. In section #4, you can request a diversion rate of 0.03 cfs per acre, if the total acreage is fewer than 5 and 0.02 cfs per acre if the acreage to be irrigated is over 5 acres. Please determine the amount of acres to be irrigated, make the calculation and indicate that amount in section #4. You will also need to include irrigation in section #9 as well.

I have attached an aerial photograph depicting a boundary and approximate location of the well for your project. Please confirm that this boundary is correct. To help you with estimating the acreage to be irrigated, the land encompassed within the yellow line is approximately 3.78 acres.

I also understand this application is to cover one home as well as the vacation trailer sites. Please indicate the one home in section #8(d) of the application.

COPY

Please provide this information within the next 30 days so as not to delay the processing of your application. I have enclosed a new application form for your convenience and if you have any questions, feel free to contact me at this office.

Sincerely,

Keith E. Franklin
Senior Water Resources Agent

Enclosure.
