Re: S.O. Comments

Application is for dust abatement at a motocross track just outside of Payette. A rate of 0.8 cfs industrial use is being applied for. Water is diverted from Payette River at SENW Sec7 T07N R03W into the Lower Payette Irrigation Co Ditch. Water is then rediverted into tanker truck from the ditch in the SE of Sec17 T08N R04W roughly where Little Willow Creek meets with Big Willow Creek. Point of rediversion is about 3 miles from track. See previous comments for overlap analysis.
