5(B). Three (3) flowing warm water artesian wells feed through buried pipelines into a concrete cistern which also encases naturally, flowing hot springs (see Claims Nos. 37-4138 and 37-4139). The combined flow from the cistern is then dumped into Democrat Creek which flows into a reservoir situated in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 18, T.2N., R.18E., B.M., Blaine County, Idaho. The reservoir also collects water from water rights Nos. 37-0548, 0549, 1220, 1221, 1222 and 2142. This water is then pumped from the reservoir into a sprinkler irrigation system. Prior to installation of the sprinkler system, the water was taken from the reservoir for flood irrigation.

The three (3) wells each have eight inch (8") casings and are drilled to depths of one-hundred feet (100'), one-hundred-twenty-five feet (125') and one-hundred feet (100'), respectively.

SUBJECT Change-In-Nature-of-Use Transfer, Humboldt Investment Co.

The water of Hailey Hot Springs originally ran into an on-stream reservoir, which provided hydraulic head to ~~pipe~~ pipe the water to the Hiawatha Hotel in Hailey. The amounts claimed are what is available as overflow after earlier rights are satisfied. The original use of heating/recreation is basically non-consumptive, with water running into the Big Wood River after use in the hotel/swimming pools. The hotel burned down in 1978; since then, the pipeline from the reservoir has not been used. The transfer seeks to establish beneficial use of this water at the reservoir itself. The non-consumptive nature of the uses will not change, so no detailed analysis should be needed.
