Describe the reason for the proposed changes

Transfer creates permissible place of use for all surface and groundwater rights on this farm, consolidating land now outside pivots onto new land just south of the existing irrigated land (where a new pivot will be installed). Also ties the 2 existing wells together on paper; they have actually been tied together in a shared mainline for many years. Transfer also adds Mrs. Gardiner as co-owner of the water rights. While the north well is shared with Matthew Gardiner, the south well is not.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
