Subject: Pend Oreille Shores Resort permit 96-9050

Keith,

I understand from Shelley that you and your office are very motivated to get old permits licensed and that you are the contact to whom I should send my northern region problems.

Permit 96-9050 owned by Pend Oreille Shores Resort is a problem permit.

In my review of this file, I found that the new well may not have justified a new permit. In his field exam notes, Wayne says that the new well is being added to the old system. Please refer to License 96-8774 for the old system.

A transfer may have been the better choice to handle this change in water use.

I have **not** done the comparison needed to determine any additional beneficial use because there are other issues. According to the taxlots in ArcView, the intended place of use has changed ownership since the field exam was done. The new owners may be Beyond Hope II Inc. which is a LLC partnership originating in Wyoming. I did an Idaho business entity query and found a Jackson Wyoming address for this LLC.

We do not have change of ownership in the tracking system for the license nor an assignment of the permit in the file.

I called the phone number that I found listed for Beyond Hope Resort but apparently, they are closed for the season. I left a voice message promising to contact the Jackson address. Maybe Mr. James Lane, the Idaho contact in Hope, Idaho would be a better contact point.

I have **not started a draft license**. The Department may prefer to void the permit and make a transfer happen, with a co-incidental ownership change instead.

The Pend Oreille Shores Resort license (# 96-8774) for the original system, has at least one large drawing that had not been scanned and because you may want to refer to it, I will make sure that it gets scanned in... second thing tomorrow morning.

So that's where I am turning this 'un over to you.

THANK YOU! Call or email with questions.

And have fun,
Michele
